BTP

Modernize your SAP ecosystem with SAP BTP

Simplify complexity, empower innovation, and drive agility for a future-ready SAP ecosystem.

BTP: The Path to Innovation

SAP Business Technology Platform (BTP) is the foundation of a modern, intelligent enterprise. Designed to help SAP customers maximize the potential of their SAP investments, BTP shifts the focus from traditional monolithic systems to a flexible, modular and scalable platform of innovation.

Together, Lemongrass and SAP BTP help organizations eliminate outdated technology, stay current with new advancements, and build a future-proof architecture that supports growth and agility.

Key Features and Benefits:

- **Comprehensive Platform:** A complete solution with five key pillars—Data & Analytics, Integration, Application Development, AI, and Automation—that unlocks data potential, streamlines processes, and accelerates intelligent app development.

- **Clean Core:** Customizations are built outside the core ERP system on BTP, reducing technical debt, ensuring smooth upgrades, and keeping the core system lean and stable.

- **Modern Architecture:** A flexible, scalable framework that shifts businesses from monolithic to modular systems, boosting innovation and resource efficiency.

- **Bridge Between SAP and Business Needs:** Provides tailored solutions beyond standard SAP, leveraging SAP's R&D while meeting unique business requirements.

- **Foundation for Innovation:** BTP supports ongoing innovation, helping businesses stay ahead of technological advancements.

At Lemongrass, our philosophy is to partner with our customers, ensure they're properly enabled to make the right strategic decisions to modern their SAP systems and then we support them as needed through their migration and transformation efforts—at their own pace.

Proven Expertise: Extensive experience in SAP with a history of successful implementations.

Tailored Solutions: Custom services, including our BTP Starter Pack and migration roadmap to meet your specific needs and PI/PO Move to migrate you systems to Integration Suite.
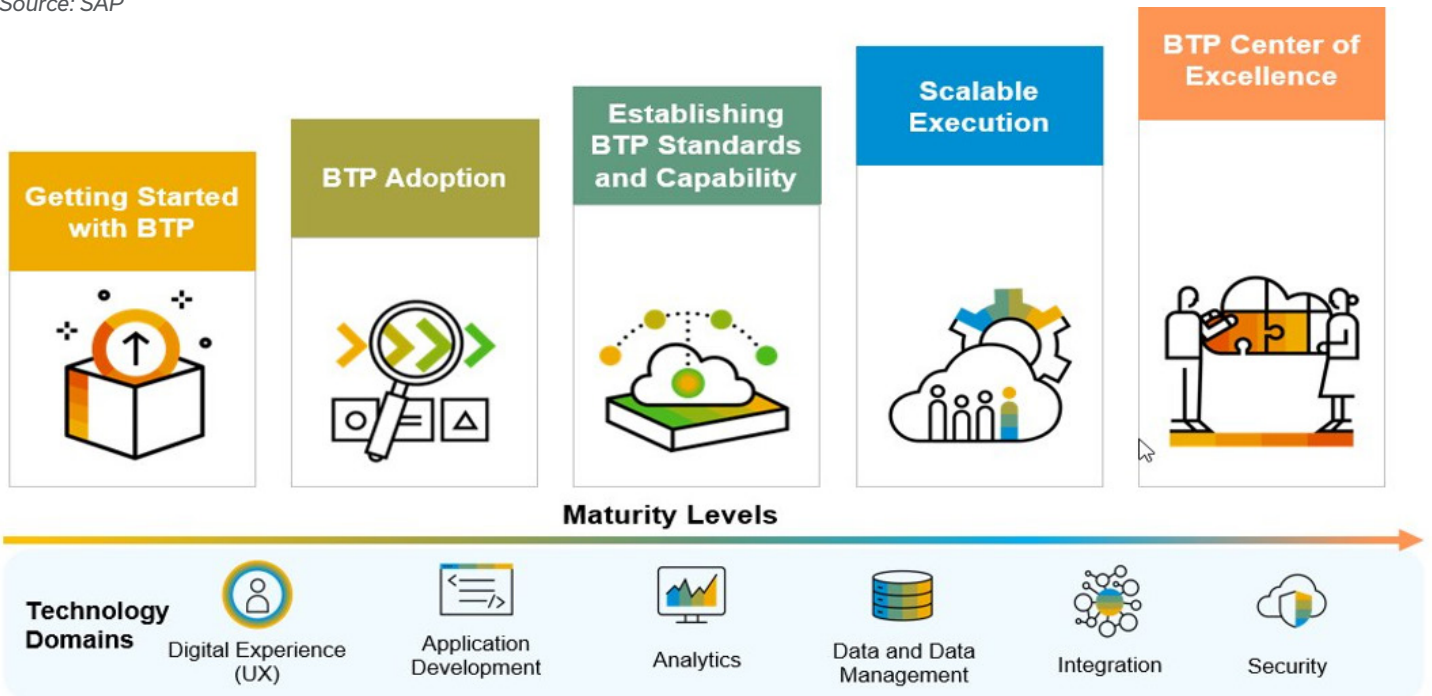

End-to-End Support: Full guidance from setup to ongoing optimization.

Innovative Approach: Utilizing SAP's latest advancements to future-proof your business with agility and scalability.

SAP BTP Journey

Our Services:

PLAN

BTP & RISE Advisory Services: Expert guidance to optimize your SAP transformation with BTP and RISE for enhanced business outcomes.

Clean Core Assessments: Assess your ERP system to ensure minimal customization, reduce technical debt, and maintain system stability.

BTP Starter Pack: A tailored, fast-track solution to kickstart your journey with SAP Business Technology Platform (BTP).

MIGRATE

PI/PO Move: With SAP BTP's powerful Integration Suite, we ensure a seamless transition by providing a flexible, scalable platform designed for integrating both SAP and non-SAP systems.

BW Move: We seamlessly migrate your SAP BW system, ensuring minimal disruption, optimized performance, and full integration with your existing SAP landscape.

Talk to us today about where you are and where you want to go in your SAP modernization journey.
